The UCSB Economic Forecast Project is looking to hire 3 interns for the 2016-2017 academic year. Interns will work under Professor Peter Rupert and leading PhD candidates in the economics department. The internship is paid.

About the EFP

The Economic Forecast Project was established in 1981 by the Department of Economics at UC Santa Barbara to provide the community with information on economic, demographic, and regional business trends in the Santa Barbara, San Luis Obispo, and Ventura County areas. Our primary research activity is the collection and verification of statistical data and other evidence about the changing business and economic environment in our county. From the assessment of these data, the Economic Forecast Project monitors the status of the economy and provides projections of future economic activity in the local area.

Apply

Candidates for this internship must meet the following requirements:

- Sophomore and above with minimum 3.0 GPA (juniors are ideal).
- Intermediate knowledge of Excel (advanced preferred)
- Economics or Economics & Accounting majors are preferred (pre-majors may apply)

If you are interested in this opportunity, please e-mail your cover letter and resume to Kenneth Freeland at kenneth.freeland@ucsb.edu. Please also include a relevant writing sample if possible. Application deadline is October 3rd.
